Mood (mūd), *sb.*² [An alteration of MODE *sb*, due to association with MOOD *sb.*¹]

1. *Logic.* (= MODE *sb.* 3 a.) Any one of the classes into which each of the four 'figures' (see FIGURE *sb.* 23) of valid categorical syllogisms is subdivided on the ground of the several ways in which syllogisms differ with regard to the quality and quantity of their constituent propositions.

The moods have mnemonic names (BARBARA, CELARENT, etc.), in which the three vowels represent the quality and quantity of the three propositions A=universal affirmative, E=universal negative, I=particular affirmative, O=particular negative. (Some of the consonants also have significant functions) The number of recognized moods is 19, viz four in the first figure, four in the second, six in the third, and five in the fourth

A different, probably a historically older, sense of the word occurs in some writers (e g. Aldrich and Whately) alongside the sense above explained, and without being expressly distinguished from it. In this sense the mood of a syllogism is the type of structure to which it belongs in respect of quality and quantity alone, without regard to the figure, so that, e.g Celarent in the first figure and Cesare in the second would be not two moods but two varieties of the same mood. (See quot 1906, where this sense is definitely adopted to the exclusion of the other)

[1532 see MODE *sb* 3 a] 1569 J. SANFORD tr. *Agrippa's Van Arts* 21 b, A Syllogisme which ought to be in one of the XIX Moodes 1589 *Marprel Epit* E IV b, The moode answereth unto Celarent, elder daughter to Barbara 1638 CHILLINGW *Relig. Prot.* I iii § 29 142 In what mood or figure, would this conclusion follow out of these Premises? 1870 JEVONS *Elem Logic* XVI 136 We call each of these triplets of propositions a mood or form of the syllogism. 1884 tr *Lotze's Logic* 88 The above rule, which, where both premisses are affirmative, requires one to be universal, prescribes a particular affirmative conclusion, and admits the moods *Darapti, Datisi*, and *Disamis* 1906 JOSEPH *Logic* XII 240 The difference of mood depends on the quantity and quality of the propositions composing the syllogism This may be the same in different figures, or different in the same figure. The different moods have received distinct names in the various figures wherein they occur, and hence what are called the 'mood-names' indicate both figure and mood.

2. *Gram* Any one of the several groups of forms in the conjugation of a verb which serve to indicate the function in which the verb is used, i.e. whether it expresses a predication, a command, a wish, or the like, that quality of a verb which depends on the question to which of these groups its form belongs.

The prevailing view that the root is **mē-*, to measure (the moon having, it is supposed, been named from its function as a measurer of time) is plausible, but cannot be considered certainly true.]

1. The satellite of the earth; a secondary planet, whose light, derived from the sun, is reflected to the earth and serves to dispel the darkness of night.

The moon's constantly recurring changes and phases (see 1 c and NEW MOON, FULL MOON, HALF-MOON, HARVEST MOON, and cf CRESCENT, QUARTER) have caused it to be taken as a common type of changeableness or fickleness. They are popularly supposed to influence the health of body and mind, and to cause lunacy (cf LUNATIC) The moon's appearance to the eye of being diversified with light and dark patches gave rise to the fanciful comparison of its disc to a man's face (see 1 f and MAN-IN-THE-MOON) It has been worshipped as a deity by many races; in classical mythology it was identified with various goddesses (see 1 b) Its white or silvery light is taken as emblematical of coldness or chastity

The moon's attraction is the chief cause of the tides. The period in which the moon completes her series of changes, or in which her orbital revolution brings her back to the same apparent position with regard to the sun, is called a month; in astronomical use this term is applied in a wider sense (see MONTH *sb*[1] *a* a)

b. Since the disappearance of the grammatical genders of OE, in which *móna* was masc., the feminine pronoun has commonly been used in referring to the moon, even when no personification is intended (the neuter pronoun occurs, but less frequently); in poetry the moon is often personified, always as a female, and sometimes, after classical example, identified with various goddesses, as Cynthia, Diana, Phœbe.

5. Expressions in which *more* (in sense B 2) is followed by *than* with a designation of number or quantity admit of being used instrumentally or adverbially, as in 'more than ten years old'. The analogy of these has given rise to expressions like 'more than once' (a multiplicative corresponding to the quasi-numeral 'more than one'). Hence, from the 16th c. onwards, *more than* has been placed before adjs, advs, vbs., and descriptive sbs, to indicate that the word thus qualified is (in some obvious respect) inadequate to the intended meaning.

More, var MOHUR, obs. f. MOOR.

-more (mōəɹ), *suffix*, forming advs of place (rarely of time) in the comparative degree (most of which have given rise to adjs of identical form). Chiefly appended to advs. having already the comparative ending *-er*, as in *backer more*, *downermore*, *farther more*, *further more*, *hindermore*, *innermore*, *outermore*, *over more*, *rather more*, *ultermore*; in the 16–17th c a few formations occur in which it is added to a positive or uncompared adv, as *hindmore*, *hither more*, *inmore*, Sc. *yonder mair.*

The suffix is identical with MORE *adv.*; the addition of this adv to comparatives occurs in Scandinavian, as ON *fyrrmeir* earlier, *firr meir* farther off, *nærmeir* nearer, OSw. *innar mer* = INNERMORE, *nithermer* = NETHERMORE The earliest instances in Eng. occur in the Ormulum (*furthermore*) and the Cursor Mundi (*farthermore*, *innermore*); it is therefore likely that the use was originally due to Scandinavian influence. But the majority of the comparatives in *-more* were formed to correspond to previously existing superlatives in -MOST, which were partly altered forms of OE. superlatives in *-m-est*, and partly new formations on the analogy of these.

Morganatic (mɔ̄ɪgănæ·tɪk), *a* [ad mod.L. *morganāticus* (whence G. *morganatisch*, F. *morganatique*, It. *morganatico*, etc) evolved from the med L. phrase *matrimonium ad morganaticam*, where the last word is prob. synonymous with *morganāticum* MORNING-GIFT, f. OHG. *morgan* (= MORN) in **morgangeba* morning-gift (*morgangiba* in Gregory of Tours, 6th c, MHG *morgengâbe*). The literal meaning of the term 'morganatic marriage' (*matrimonium ad morganaticam*) is, as is explained in a 16th c. passage quoted by Du Cange, a marriage by which the wife and the children that may be born are entitled to no share in the husband's possessions beyond the 'morning-gift'] The distinctive epithet of that kind of marriage by which a man of exalted rank takes to wife a woman of lower station, with the provision that she remains in her former rank, and that the issue of the marriage have no claim to succeed to the possessions or dignities of their father; also, occasionally, used to designate the marriage, under similar conditions, of a woman of exalted rank to a man of inferior station. Hence *morganatic husband, wife*

A morganatic marriage is sometimes called a 'left-handed marriage' (G *Ehe zur linken hand*), because in the ceremony the bridegroom gave the bride his left hand instead of his right The latter term is sometimes used in a wider sense, for the *matrimonium inæquale* of German law, in which, though the spouse of inferior rank was not elevated, the children retained the rights of succession

Mormon (mɒ·ɹmən) [f *Mormon*, the name of the pretended author of 'The Book of Mormon': see below. The earlier name was Mormonite]

1. A member or adherent of a religious body, calling itself 'The Church of Jesus Christ of the Latter-day Saints', founded in 1830 at Manchester, New York, by Joseph Smith, on the basis of alleged Divine revelations contained in the 'Book of Mormon', which Smith professed to have translated by special inspiration from the original written on gold plates, miraculously discovered by himself.

The feature of the sect which is popularly best known, and which is referred to in allusive uses of the name, is the practice of polygamy. but this is not countenanced by the Book of Mormon, and is now understood to have been abandoned in obedience to the law of the United States

[Com Teut the OE. forms represent three distinct types, each of which is represented in one or more of the other Teut. langs. (3) OE *margen, mergen* = MDu *margen, mergen*, ON. *mergunn* (OSw *morghan*):—OTeut. **margano-z, -ino-z* The word in all forms retains the masculine gender.

The affinities outside Teut are doubtful Some refer the word to the pre-Teut. root **merk-* to be dark; but the absence of consonant ablaut, as well as the inappropriateness of the sense, seems to render this view less probable than the alternative hypothesis that the root is **mergh-*, represented by Lith *mirgu* to twinkle, *margas* parti coloured

The present monosyllabic form descends, partly at least, from the OE contraction in oblique cases, *morne, mer es* for *morg(e)ne, morg'es* (The same contraction existed in ON.) But it may also in part represent the result of a process of contraction starting from ME *n orwen*, the intermediate forms being *morun, moren*, etc

The ME. forms that retain the final *n* are for convenience placed here, though many of them might with equal propriety be referred to MORROW. In MSS it is often doubtful whether the word is *morn* or *morn* = 'morrow']

The L *mortārium* in the sense 'product of trituration' (applied by Juvenal to drugs, and by Vitruvius to mortar) is commonly regarded as a transferred use of *mortārium* MORTAR *sb.*[1] 1, which was applied by extension to the trough in which mortar was mixed It is possible, however, that the two senses of the Latin word are equally original, the suffix *-ārium* being employed in two different functions]

A material consisting of lime and sand mixed with water, which is used to make the joints between stones and bricks in building, and which, when set, binds them together into a solid mass Also applied to materials of other composition used for the same purpose.

Various kinds are *gauged, hydraulic, pointing, pozzolana, trass, water mortar*, etc.; see the qualifying words.

The collocations *stone and mortar, bricks and mortar*, are freq. used to denote the essential materials used in building, the latter phrase is also employed colloq for 'houses' or 'house property' (sometimes attrib.)

It seems probable that 'dead hand' in English legal use is a metaphorical expression for impersonal ownership, and is unconnected with the older feudal use of *manus mortua* to denote the custom by which serfs (and other classes included under the term *homines manus mortuæ*) had no power of testamentary disposition, their possessions, if they died without legitimate offspring, reverting to the lord]

Most, obs. form of MUST *sb* and *v.*

-most (mōust, möst, məst), *suffix*, forming adjs in the superlative degree (many of which are also used as advs), is an altered form of OE. *-mest* (= Goth. *-umist*), a combination of two distinct OTeut (and Indogermanic) superlative suffixes, *-mo-* (which occurs, e g, in OE. *forma* first, *hindema* last, and in L *primus* first), and *-isto-* -EST. Those OE superlatives in *-mest* which either descend from OTeut, or are extensions of OTeut superlatives in *-mo-*, are formed not on adjs. but on prepositional or demonstrative stems; examples are *æftemest* (see AFTERMOST), *formest* or *fyrmest* FOREMOST, *innest* INMOST, *niðemest* lowest, *ufemest* or *yfemest* (see OVEMEST), *iitmest* or *ytmest* UTMOST, *ymest* (= Goth *auhumists*) highest; the only instance (among the words belonging to this primary group) of formation on an adj -stem is *midmest* MIDMOST. On the analogy of these older words, the suffix *-mest* was in OE used to form superlatives of several adjs. of local and temporal signification, as *lætmest, siðemest* latest, *æstmest, westmest* (also *westema*), *norðmest, suðmest.*

In late OE. the adjs. in *-mest* came to be regarded as compounds of *mæst* MOST, as the frequent spelling *-mæst* shows The subsequent history of the written form of the suffix coincides with that of the adj, exc that the absence of stress led to the occasional retention of the spelling *-mest* (beside the quasi-etymological *-most*) down to the 16th c. In mod English the formal pronunciation of the suffix is assimilated to that of the adj., though colloq. the normal pronunciation (məst) is usual.

As the superlatives in *-mest, -most* corresponded to comparatives in *-er*, analogy led to the insertion of *r* or *er* before the suffix · thus *aftemest* was in early ME altered to *aftermest*, and *ovemest* was replaced by *overmost* In the 15th and 16th c the suffix *-most* (interpreted as identical with MOST *a.*) was added to many comparatives in *-er*, on the analogy of earlier adverbial formations in -MORE, as in *furthermost, hindermost, innermost, lowermost, outermost, uppermost, uttermost*

In ME. and modern English, the suffix has been appended to certain positive adjs.; to sbs used adjectively, as in *backmost, bottommost, topmost*; and to advs, as in *downmost, upmost, hithermost*

The restriction of the application of the suffix to words denoting position in place, time, or serial order, which existed in OE, has almost universally been adhered to in the subsequent formations, the only exception, in a word that has obtained any degree of currency, is *bettermost.* The only other violations of the rule occur in mere nonce-words, as in the following quot.

[A WGer. and Gothic preterite-present verb (wanting in Scandinavian) · OE *mót* corresp to OFris *mōt*, OS. *mōt*, *muot* may, must (Du *moet* must), OHG, MHG. *muoz* may, must (mod G. *muss* must), Goth *ga-mōt* (it) has room, related to OHG. *muoza* (mod G *musse*) leisure —OTeut type **mōtā*.

The primary sense seems to be that preserved in Gothic, from which the sense 'is permitted, may' can easily have been developed The transition from this to the sense 'is obliged, must' is more difficult to explain, it may have arisen from the use in negative contexts, where the two senses ('may not', 'must not') are nearly coincident Normally, OTeut **mōt* should be the perfect of a verb **mat-*, but there is no trace of a vb of this form with a suitable sense, the word may be related to **met-* to measure (see METE *v*)

If the verb had come down to mod English, its form would have been *moot* Exc in northern dialects, it seems not to have survived in colloquial use beyond the 15th c, or at latest the middle of the 16th c In the 16th c. it was often confused with *mought* (see MAY *v*), with which it was prob identical in sound. In the early part of the 16th c, the verb was still used correctly as a present tense, though commonly misspelt *mought* In the archaistic use of Spenser and later writers, on the other hand, it is, even when written *mote*, almost always a preterite except in traditional phrases

The past (OE *móste*) is treated under MUST The survival of the inflected 2nd person (OE *móst*) is doubtful after the early part of the 15th c, on account of its formal coincidence with the past, which by that time had already assumed the function of a present]

(Sw., Norw. *mott* maggot, weevil).

The phonology is obscure. The word has usually been supposed to be cogn. w. OE. *maða* maggot (see MATHE), which is plausible as regards the sense, but the OE. form *mohðe* points rather to the Teut. root **mug-* as in MIDGE.]

1. A small nocturnal lepidopterous insect of the genus *Tinea*, which breeds in cloth, furs, etc., on which its larva feeds; a clothes-moth. In early use, the name seems to have been applied rather to the larva than to the insect itself. From the 16th c. it has been taken to denote primarily the insect in its winged state, and applied to any nocturnal lepidopterous insect of similar appearance.

†*False moth* (tr. mod.L. *pseudo-tinea*, Réaumur): an insect closely resembling the clothes-moth, but feeding on leaves.

2. *Ent.* Any insect of that one of the two great divisions of the *Lepidoptera* which includes the 'moths' in the older sense.

According to the ordinary modern use, the 'moths' are the same as the *Heterocera*, which are distinguished from the *Rhopalocera* ('butterflies') in that their antennæ are not clubbed. Most of them are of nocturnal habit.

As in the case of FATHER, the substitution of *th* for the earlier *d* dates from the beginning of the 16th c, though the pronunciation with (*ð*) probably existed earlier The occasional occurrence of the spelling *moþer* in the 14th c (e g in the Gottingen MS of the Cursor Mundi) has prob no phonetic significance, being due to association with words like *broþer, oþer*, which in fact occur in the immediate context of several of the examples The development of OE *ó* to mod E *o* (through *ō, u*, u) is normal in the case of words in *-ther, -der* cf *brother, other, rudder*. In OE the genitive sing normally coincided in form with the nom, and many instances of the uninflected genitive occur in ME and early mod E (see also 15 b) The genitive *mōderes* is common in the Northumbrian gospels (10th c)]

Mother (mʊ ðəɹ), *sb* 2 [Corresponds in meaning to MDu *moeder*, *moer* (in mod Du *moer*), G. *mutter*, identical in form and gender with the equivalent of Mother *sb*.1

Comparison with the synonymous It, Sp *madre* scum of liquids, F *mere* (*de vinaigre*), OF *mere* 'vendange pressée' (=sense 3 below), seems to show that this word, in Eng, Du, and Ger, is really an application of Mother *sb* 1 The transition of sense is difficult to explain, but most probably the scum or dregs of distilled waters and the like was regarded as being a portion of the 'mother' or original crude substance which had remained mixed with the refined product, from which in course of time it separated itself (The term may possibly have belonged originally to the vocabulary of alchemy) An explanation sometimes given, that 'mother of vinegar' was so called on account of its effect in promoting acetous fermentation, does not agree with the history of the use. It has been pointed out that Gr γραῦς, old woman, is used in the sense 'scum, as of boiled milk', but the coincidence is prob accidental

Most etymologists have regarded the word (with its Du and Ger equivalents) as altered by popular etymology from Du *modder* masc, mud, mire (for which Middle Du has a rare variant *moeder*, occurring chiefly in derivatives) = LG *modder*, *moder* (whence mod G *moder*), HG dial *motter* masc (for which a variant *mutter* occurs). This notion goes back to Kilian's (Du or Flemish) dictionary of 1598, which contains the two following entries (1) '*Modder*, *moder*, *moyer*, *more*, *moer*, limus, cœnum mollius, lutum, volutabrum, Ang *mire*, *mudde*', and (2) '*Modder*, *moeyer*, *moeder*, *grondsoppe*, fæx, fæces, crassamen, crassamentum, Ang *mother*' But there appears to be no evidence that the form *modder* was ever used for 'mother' or 'scum', nor is that sense recorded for Ger dial *motter*]

2. Any substance used like moxa for burning on the skin.

1833 *Cycl. Pract. Med.* I. 492/1 The material generally employed in Europe for moxas is cotton, rendered downy by carding, and made into a roll an inch long, and from half an inch to two inches in diameter. 1846 BRITTAN tr *Malgaigne's Man. Oper. Surg.* 63 A small pad was made with spider's web, and placed on the corn, it was then lighted, and left to burn as a moxa. 1877 tr *von Ziemssen's Cycl Med* VII. 227 Mustard plasters, blisters, the actual cautery, the moxa &c to the epigastrium, have sometimes given relief.

Hence **Moxibu·stion** [irreg. after COMBUSTION; cf. F. *moxibustion* (Littré 1885), cauterization by means of a moxa (Dunglison 1833–55); ‖ **Moxocau·sis** [mod.L., f. Gr. *καῦσις* burning] = prec. (*Syd. Soc. Lex.* 1891).

2 As a prefixed title Now pronounced (mi stəɹ), or with entire absence of stress (mistəɹ, m'stəɹ). The want of a plural form is supplied by *Messrs*, MESSIEURS 2.

Until the latter half of the 17th c the title was often written in the full form *master*, but there is reason for believing that from the 16th c it was, at least in rapid or careless speech, treated proclitically, with consequent alteration of the vowel of the first syllable (See MISTER *sb* 2 1, quot 1551) Eventually the word came to have the weakened pronunciation whenever it was used as a prefixed title, and it became customary to employ the abbreviated spelling always for this use, and for this only Hence at the beginning of the 18th c *master* and *Mr* were already regarded as distinct words Cf. MISTER *sb* 2, which is merely an occasional (chiefly jocular) rendering of the pronunciation of the word of which 'Mr' is the accepted spelling

The early history of the application of *Mr* is identical with that of the use of its fuller form see MASTER *sb.* 21 From the 17th c. it has been the customary ceremonious prefix to the name of any man below the rank of knight and above some humble but undefined level of social status, except where usage requires the substitution of some honorific title, such, for instance, as those denoting military and naval rank As with other titles of courtesy, the inferior limit for its application has been continually lowered, at the present day any man however low in station would be styled 'Mr' on certain occasions, e g in the address of a letter. Modern custom forbids the use of the prefix when *Esquire* is appended to the name, and it is now omitted after 'The Hon.' and 'The Rev.' (though some still write 'the Rev Mr. A' when the Christian name happens to be unknown); but in other than ceremonious use 'Mr' is substituted for these titles

The use of *Mr* before a *prefixed* title of office is nearly obsolete The Judges of the Supreme Court are still styled 'Mr. Justice A', the designations 'Mr Baron A', 'Mr Serjeant B', belonged to dignities now abolished. In municipal use we still occasionally read of 'Mr. Alderman A', 'Mr Deputy B', 'Mr Councillor C'

Before an official title *not* followed by the name, the prefix *Mr* is still common, as in 'Mr. Chairman', 'Mr. Editor', 'Mr President', 'Mr Mayor'. These are now used only vocatively, 'Mr Speaker' is used also in the 3rd person

2. As a prefixed title of courtesy. Now pronounced (mi sis, mi·siz).

In the latter half of the 17th c there was a general tendency to confine the use of written abbreviations to words of inferior syntactical importance, such as prefixed titles The form *Mrs* for *mistress* therefore fell into disuse except when prefixed to a name, and in this position the writing of the full form gradually became unusual. The contracted pronunciation, which in other applications of the word has never been more than a vulgarism (see MISSIS), became, for the prefixed title, first a permitted colloquial licence, and ultimately the only allowable pronunciation When this stage was reached, *Mrs* (with the contracted pronunciation) became a distinct word from *mistress* As to the chronology of these changes evidence is wanting, but it may be noted that Walker 1828 says that *mistress* as a title of civility is pronounced *missis*, and that 'to pronounce the word as it is written would, in these cases, appear quaint and pedantick'.

a. Prefixed to the surname of a married woman (sometimes with her Christian name or that of her husband intervening).

Originally distinctive of gentlewomen, the use of the prefix has gradually extended downwards; at the present time, every married woman who has no superior title is styled 'Mrs' even though her husband is of so humble a position as not ordinarily to be referred to as 'Mr' In British use the insertion of a woman's Christian name after *Mrs.* (as 'Mrs. Mary Smith') is rare exc in legal documents, cheques, or the like, the normal practice when distinction is needed being to insert the husband's name (as 'Mrs John Smith') In the U S both these modes of designation are in general use

Multi- (mʌ lti), occas. before a vowel **mult-** (e. g. *multangular, multarticular, multocular*), combining form of L *multus* much, many The compounds having this prefix in Latin belong for the most part to non-classical times they are chiefly of parasynthetic formation, in which *multi-* = 'many', as *multangulus* many-angled, *multicaulis* many-stalked, *multigenerus* of many kinds, but a certain number of objective or adverbial compounds also existed, in which *multi-* = 'much', as *multibibus* much-drinking, *multicupidus* desiring much, *multiscius* knowing much

In English the compounds of *multi-* were originally either direct adaptations from Latin compounds or were modelled upon them, but in the 19th c. the prefix came into frequent general use with ppl. adjs. and sbs. (Cf. POLY-.) The earliest English borrowings from Latin were *multifary* (Lydgate), *multifarious* (Nashe, 1593), *multiformity* (Puttenham, 1589), they did not become numerous till the middle of the 17th c The more important compounds (being chiefly those which have a continuous history from the 17th c. onwards) are entered as Main words, the present article comprises a typical selection of modern scientific terms and of compounds of a general character.
